

## **Fall 2021 - Youth Program - 3D Printing Club**

### **Description:**

This is an introductory course to additive manufacturing (3D printing) and 3D computer assisted design and modelling. Students will have a chance to express their creativity and develop information technology skills in a fun learning environment! Students will also be able to bring home their 3D printed models each week.

If participants have access to a laptop they are asked to bring it with them. No software is required to be downloaded or installed, everything can be done through an internet browser window.

### **Instructor Bio - Simon Herbinger**

Simon is a mechanical engineering student at Dalhousie University who lives and grew up in Shad Bay attending AMTB and Brookside Jr High. He is very passionate about 3D printing and design, owns his own desktop 3D printer and has years of 3D CAD modelling experience. He is excited to share his passion!
